Added in [API level 3](#)

ParcelableSpan

implements [Parcelable](#)

android.text.ParcelableSpan

► Known Indirect Subclasses

AbsoluteSizeSpan, AlignmentSpan.Standard, Annotation, BackgroundColorSpan, BulletSpan, EasyEditSpan, ForegroundColorSpan, LeadingMarginSpan.Standard, LocaleSpan, QuoteSpan, RelativeSizeSpan, ScaleXSpan, StrikethroughSpan, StyleSpan, and 6 others.

Class Overview

A special kind of Parcelable for objects that will serve as text spans. This can only be used by code in the framework; it is not intended for applications to implement their own Parcelable spans.

Summary

Inherited Constants [\[Expand\]](#)

- From interface android.os.Parcelable

Public Methods

abstract int `getSpanTypeeld()`
Return a special type identifier for this span class.
